SUBJECT · EG7G REQUEST FOR 881 HILLSIDE REPORT

Don Kudera (EG&G) has made a number of inquiries regarding waste materials Rocky Flats Plant has shipped to Idaho. He is investigating ground water contamination present at the EG&G facility. In his most recent telephone conversation, Kudera asked for a copy of the 881 Hillside Remedial Investigation report (see attached memo). Would you follow up on his request? I've asked my staff to refer future calls from EG&G to your office.

Thanks.

G. L. Potter, Manager
HS&E Operations Management
